Component-1(Navbar)

In the navlink it contains the categories section which we are fetching from the api the function will call on click and it will show in a dropdown

(Navbar...)

By clicking on the user profile icon it will show some options as a dropdown which will be used to logout the user and show the user profile page

Component-2(Carousel)

The carousel component contains two buttons one search advertisement on click on the show advertisement it will move the search bar which is place below the carousel

Component-3 (Search with carousel component)

It uses the bootstrap collapse component to show the result on click the more details button it will redirect to card-details component. There will be three options to search on the basis of name on the basis of category on the basis of city area we can use this together and also we can use one of any separately like if we want to search on the basis of just keyword then it will just take the keyword value from the user and show data. Also all the category will be shown in the searchbar component will be fetched from the database it will also allow the user to search only on the basis of the category in the last the city area will also be fetched from the database and it will allow the user to filter only those results on the basis of that city area and when the user press it the search button it will show all the advertisement
